N2Power Welcomes Al Garcia as General Manager

Expanding our team with a seasoned industry veteran demonstrates N2Power's commitment to future growth.

CAMRILLO, Calif.—June 25, 2020— N2Power, a leading manufacturer of compact, ultra-efficient power supplies (PSUs), is pleased to announce the appointment of Al Garcia to the position of general manager and strategic advisor. In this role, he will be instrumental in generating new opportunities for product development and sales as well as driving expansion into untapped markets.

He comes to the company with over three decades of experience working in the power supply distribution and OEM sales field. He has spent most of his career working with customers in the Silicon Valley region. Also, he has significant expertise in building out International markets for power and power-related products.

"Al has a proven background in sales and product development. He will play a key role in our plans to bring to expand our product offerings to new and existing customers," says CEO Steven N. Bronson. "We look forward to utilizing Al's insight and strategic know-how to bolster N2Power's aggressive plans for growth further."

Before joining N2Power, Garcia worked on PSU projects for major companies, including Abbott Laboratories, BD Biosciences, HP, Lumentum, McAfee, and Thermo Fisher Scientific. An experienced problem-solver and organizer, he managed teams of field engineers in the design and manufacture of both standard and value-added power supplies. This background will be brought to bear as Garcia works closely with customers to develop their ideal power solutions.

"I've worked with N2Power's products for a long time, and I have always been impressed with their quality and support," says Al Garcia, general manager and strategic advisor for N2Power. "I'm thrilled to be a part of the team and look forward to helping take N2Power to the next level."

About N2Power

N2 Power was founded in Southern California in 1999 as a designer and manufacturer for the OEM market of state-of-the-art, ultrasmall standalone switch-mode power supplies and power assemblies that are reliable, energy efficient, and environmentally friendly. Building off our track record of innovation and reliability, today our UL and ISO certified line with efficiencies of 90% plus, encompasses a range of standard, modified standard, and value-added power solutions for the ITE, broadcast, industrial, kiosk, medical, gaming, lighting, and test equipment markets, among others. While still based out of our Camarillo, California, headquarters, we have expanded our global footprint and partnerships in recent years giving us access to new markets and increased development capabilities. Capitalizing on our expertise and more than 20 years of experience in power design, our in-house engineering team works closely with each individual customer to ensure the very best solution is integrated into their final product design. N2Power is a wholly owned subsidiary of Qualstar Corporation (OTC: QBAK).
